

ComicCraft – AI Comic Story Creator Using Gemini Models

Phase 7 – Project Documentation

1. Documentation Objective

The documentation phase records the complete details of the ComicCraft project.

It explains:

- Project idea
- Requirements
- System design
- Technologies used
- Development process
- Testing results
- Final output

2. Project Documentation Contents

1. Project Title

ComicCraft – AI Comic Story Creator Using Gemini Models

2. Project Description

ComicCraft is a web-based application that uses Gemini AI to generate comic stories from user-provided prompts.

3. Technologies

- HTML
- CSS
- JavaScript
- Python
- FastAPI
- Gemini AI

4. Main Features

- Story prompt input
- AI story generation
- Character generation
- Scene generation
- Dialogue generation
- Comic panel descriptions

3. Sample Documentation Coding

```
project = {  
    "name": "ComicCraft",  
    "ai": "Gemini",  
    "backend": "FastAPI",  
    "frontend": "HTML, CSS, JavaScript"  
}  
  
print(project)
```

4. Final Project Summary

ComicCraft
↓
User enters story idea
↓
FastAPI receives prompt
↓
Gemini AI processes prompt
↓
Comic story is generated
↓
Characters + Scenes + Dialogues
↓
Final comic story displayed

5. Conclusion

ComicCraft demonstrates how Gemini AI can be used to create a structured comic story from a simple user idea. The project includes story generation, characters, scenes, dialogues, and panel descriptions.
